### **2 TECHNOLOGIES, 4 SKIN LAYERS**

The uniqueness of the Maximus platform also lies in the combination of technologies that complete each other by treating different aspects of body improvement simultaneously and enhancing each other's results. Both Tripollar RF and DMA work on the upper and deeper layers of the skin, the fat cells and the underlying muscles to achieve body reshaping, fat reduction, lymphatic drainage, skin tightening and overall body contouring.

### **THE COST-EFFECTIVE OPTION**

With Maximus' unique technological combination, endless treatment plans can be performed in a shorter time and a more cost-effective manner. This allows you the opportunity to offer your patients quick and focused sessions that until now were only available by using several different devices.

MAXIMUS OFFERS TWO UNIQUE TECHNOLOGIES IN ONE PLATFORM, WORKING SEPARATELY AND SIMULTANEOUSLY ON THE SKIN, THE MUSCLES AND THE FAT CELLS:

#### DMA

DYNAMIC MUSCLE ACTIVATION

A unique proprietary technology aimed at improving and enhancing the muscle tone while treating different layers of the underlying muscles. The unique and innovative motion induces muscle contraction which

increases muscle density and volume. the result is a well-defined and toned body. The combination of DMA with RF treats multiple deep tissue layers simultaneously, resulting in effective fat reduction and skin tightening.

#### TRIPOLLAR® RF

RF at its best performance and efficacy. This supreme 3<sup>rd</sup> generation technology is targeted at deep heating of skin layers, that encourages regeneration of collagen and elastin to achieve tighter and smoother skin. In addition, TriPollar RF heats the fat cells, thus accelerates their

metabolism and reduces their volume. This results in body contouring and minimizes the appearance of cellulite. The unique mode of operation utilizes a tri-polar delivery, elevates energetic density and creates more volumetric heating, for exceptional performance and results.
